

Tell MoCo Council:

NO Cell Towers in Front Yards!

- 24/7 Radio-Frequency (RF) radiation
- Health & safety hazards documented by independent scientists
- Lawsuits against FCC to update their 1996 exposure limits to align with current science
- Harm to trees & wildlife
- Data & privacy issues
- Sinking property values
- Doesn't solve the digital divide—only wired fiber to the premises can do that
- Surveillance/commodification of our private activities, without our knowledge or consent violates 4th Amendment rights
- Lack of transparency, accountability & oversight
- Soaring energy consumption, making climate change worse
- Bias towards industry—and its 5G propaganda—is short-circuiting elected officials' duty to prioritize public interests

**ZTA 19-07 is industry-aligned,
UNFAIR & UNSAFE
for Montgomery Co. residents.**

(Learn more: TechWiseMoCoMD.org & mocoSafeG.org)

MoCo Council will soon vote on ZTA 19-07, which allows cell towers 30 ft.—or less!— from our homes. We need a new ZTA and County leaders that will serve and protect MoCo residents—not cave to industry interests.

Take Action to Stop ZTA 19-07

Send Councilmembers a Letter in 1 Minute or Less!
